DETAILED ACTION

Specification

The abstract of the disclosure is objected to because of grammatical errors.

Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: the continuing information on page 1, should be updated to reflect the current status of the parent application.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1, "said equipment" lacks proper antecedent basis, and the recitation in the last line of the claim of "without any need of drying said fluid" is found to be vague and indefinite because it is nonsensical. Clarification is required.

With respect to claim 2, "the ceiling", "said equipment" and "the fluid" all lack proper antecedent basis. Also, the recitation of "large pressure difference" is found to be vague and indefinite because it is unclear as to what would actually constitute a "large" difference. Clarification is required.

With respect to claim 15, this claim is found to be vague and indefinite because while it recites "the fluid" in line 2, it appears to be a fluid other than that previously recited as present in the vessel. Clarification is required.

With respect to claims 17-18, the recitation of "metal objects inserted into a body of a patient" is improper. These objects cannot be inserted into the body while in the pressure vessel being treated. It is suggested that "configured to be" be added prior to "inserted".

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,610,251 B1.

Although the conflicting claims are not identical, they are not patentably distinct from

each other because they are of the same inventive concept, namely the sterilization of objects with supercritical extraction, those objects being similar porous objects.
